

Bedtime Stories For The Little Ones

UNCLE WIGGLY AND JOHNNIE'S JOKE

By HOWARD B. GARRIS

ONCE again it was all still and quiet in the hollow stump schoolhouse. It was about ten o'clock when Uncle Wiggly, the boy squirrel, took out his bag of nutshells and dropped them.

The lady mouse teacher was waiting for the hollow stump school to open. She was waiting for the hollow stump school to open. She was waiting for the hollow stump school to open.

The lady mouse teacher was waiting for the hollow stump school to open. She was waiting for the hollow stump school to open. She was waiting for the hollow stump school to open.

HOROSCOPE

THIS day the sun shines on many things, according to astrology. Early in the morning Mercury is in benefic aspect.

Public fortune should attend all who have personal ambitions to promote. It is a most auspicious time for those who seek place or honor that can be bestowed by persons of wealth or high position.

The signs are promising for the president of the United States who will gain much acclaim through some public document or diplomatic move.

It should be a lucky day under which to look for any piece of employment, since highly wages are supposed to be easily obtained while this configuration prevails.

Publicity continues under the beneficent rule of Mercury and there is a forecast of success for writers, editors and publishers who will profit much in the next few months.

Warning has been given repeatedly against the folly of extravagance, for the stars foreshadow financial stress long before bankers began to counsel thrift. Now it is prophesied that there will be a serious reaction from the recent recklessness in spending money.

Scandals will be more numerous in the coming summer than ever before and blackmail seems to be foreshadowed. Since highly wages are supposed to be easily obtained while this configuration prevails.

Great heat will be experienced in Washington, D. C. during the coming summer. If the stars are read aright.

Persons whose birthdate it is may expect an active year that is prosperous, but they must not speculate. Children born on this day are likely to be quizzical and clever. These subjects of Pisces are on the cusp and so are likely to have Aries traits.—Copyright, 1920, by McClure Newspaper Syndicate.

Beauty Chats By Edna Kent Forbes

For Skin Eruptions.

OF course the best way to have a fine-grained, clear skin is to live a simple hygienic life and keep in good health. But there are various external treatments which can be given which will help to clear the skin. A prolonged case of pimples and eruptions usually causes a further breaking out, and this condition is cured by using some drying lotion such as the one which I am giving today.

Take a half pint of pure alcohol and add to it a small amount of sulfur. The sulfur should be of the finest quality, and the alcohol should be of the purest. The mixture should be shaken well and used as a lotion for the face.

Keep this combination of sulfur and alcohol in a closely corked bottle. At night, before you go to bed, take small waives of absorbent cotton, hold them over the open top of the bottle and shake well so that the sulfur precipitated at the bottom of the bottle will be thoroughly mixed with the liquid, and so that the absorbent cotton will become thoroughly saturated. Put the wet cotton over the pimples and continue until you have covered every eruption with a bit of saturated cotton. Let this stay on as long as possible. If you take the treatment during the day you can renew the cotton every half hour as it dries out.

Personette By NIKSAH. GALLIEO. POOR old Gallieo spent most of his 70 odd years defending the Copernican system against all comers, and now along comes Einstein and smashes things all up again. Of course, the stars go on twinkling and inspiring poets and performing their various heavenly duties just the same, no matter what theories are built up around them.

Gallieo had an especially hard time of it trying to make people believe the earth was in motion. The way of a scientist to make more difficult in the 18th century than it is now when the promulgator of any new theory, however wild, is welcomed with open arms and full page features in all the Sunday editors. It must have been hard for Gallieo to concentrate, when the question was always, "summoning him away from his telescope and asking him to change his mind about the universe or take the consequences. One can only be glad that Einstein does not say that since there is no unique absolute space (according to his theory) and since all motion is relative, it would be just as true to say that the earth moves with reference to a street car, for instance, as that a street car moves with reference to the earth. And it would be hard probably even for Gallieo to argue with a person who talks like that. Nevertheless Gallieo would have taken him on without a doubt. Even in school his nickname was "the Wrangler" because of his disputatious habits.

There is an interesting story about how Gallieo discovered the movement of the pendulum as a measurement of time. When he was a youth of 16 he was kneeling in church one day and allowed his attention to wander, as the attention frequently does at such a time. He looked up and saw a hanging lamp swinging to and fro. The rest was easy to his scientific mind—hence the pendulum. It is trivial that a man who was so keenly interested in seeing Nature as she truly is should have spent his last days on earth in total darkness. In one of his last letters he speaks rather pitifully of his affliction: "I have been for a month totally and incurably blind, so that this heaven, this earth, this universe which by my remarkable observations and clear demonstrations have enlarged a thousand fold beyond the limits universally accepted by the learned men of all previous ages are now shrouded up for me into such narrow compass that it only extends to the space occupied by my person."

RAIL COMMISSION PROMISES RELIEF IN CAR SHORTAGE. Washington, D. C., March 18.—Members of congress from the southwestern section of Texas are receiving many telegrams from truck growers complaining of the shortage of cars to move crops. Between 1909 and 1919 cars will be needed. There is a shortage of 20,000 of the particular type of car used.

Representative Garner today conferred with the interstate commerce commission officials and received promise that every car that can be secured will be routed to the truck country.

ASPIRIN—Its Uses

First Introduced by "Bayer" in the Year 1900

The name "Bayer" identifies the true, world-famous Aspirin prescribed by physicians for nineteen years. The name "Bayer" means genuine Aspirin proved safe by millions of people.

In each unbroken package of "Bayer Tablets of Aspirin" you are told how to safely take this genuine Aspirin for Colds, Headache, Toothache, Rheumatism, Neuralgia, Lumbago, Eczema, Neuritis and Pain generally.

Always say "Bayer" when buying Aspirin. Then look for the safety "Bayer Cross" on the package and on the tablets.

Handy tin boxes of twelve tablets cost but a few cents. Drug-gists also sell larger packages.

Aspirin is trade mark of Bayer Manufacturing Monopolies of Salzig, Germany.

New Hair Growth After BALDNESS

HAIR GROWN ON MR. BRITAIN'S BALD HEAD BY INDIANS' MYSTERIOUS HAIR GROWER

My head at the top and back was absolutely bald. The scalp was shiny. An expert said that as he thought the hair roots were eaten, and there was no hope of my ever having a new growth of hair. The hair, at an age over 40, I have a luxuriant growth of soft, strong, brown hair. No trace of baldness. The pictures shown here are from my photographs.

Indians' Secret of Hair Growth

At a time when I had become discouraged at trying various hair lotions, ointments, and treatments, etc., I came across, in my travels, a Cherokee Indian. He told me that he had a secret of hair growth. He said that he had a secret of hair growth. He said that he had a secret of hair growth.

How YOU May Grow YOUR Hair

My honest belief is that hair roots rarely die even when the hair falls out through disease, fever, excessive dryness, or other disorders. I have been told by experts that often when hair falls out the roots become imbedded within the scalp, covered by hard skin, so that they remain for a time like bulbs or seeds in a bottle when will grow when fertilized. Shampoo (which contains alkali) and hair lotions which contain alcohol are enemies to the hair. At the very least, it is better to use a mild soap, and to wash the hair with lukewarm water. I have grown my hair back in a few months. I have grown my hair back in a few months. I have grown my hair back in a few months.

A Jar of Vicks is Protection Against Colds

More than a score of years ago, a druggist in a little North Carolina town was searching for a better way to treat colds. He knew that epinephrine and internal medicines did not go direct to the lungs and air passages, and often did derange the digestion.

At last he found a process by which he could combine standard, time-tested remedies in salve form, so that when the salve was applied over the throat and chest the ingredients would be vaporized by the body heat.

These vapors, inhaled with each breath, carried the medication direct to the lungs and air passages. At the same time the salve was absorbed through and stimulated the skin, aiding the vapors inhaled to relieve the congestion.

This preparation was named Vicks VapoRub, and year by year its use has steadily grown until now more than 17 million jars are used annually.

Vicks is a Real "Little Bodyguard" to Old and Young

For mothers with small children Vicks is a boon indeed. No dosing—just apply well over the throat and chest at the first sign of "sniffles," and cover with a hot flannel cloth. Leave the covering loose around the neck so the vapors arising may be freely inhaled. An application at bed time usually prevents a night attack of spasmodic croup.

VICKS VAPORUB

Famo Destroys Dandruff Bacilli

Science has perfected a wonderful preparation that stops dandruff (the medical term for dandruff) by killing the dandruff microbe.

Its name is FAMO, and it is a product of one of the recognized pharmaceutical laboratories of Detroit.

The ingredients have never been used on the scalp before, but they are well known to physicians.

As fast as nature grows new hair the dandruff germ kills it off.

Unless you destroy the germ with FAMO, the new hair will grow weaker and weaker and baldness finally will result.

FAMO destroys the dandruff bacilli and makes new, luxuriant hair grow. FAMO actually restores grayness. It contains no alcohol. It stops all itching of the scalp.

FAMO should be used daily by every member of the family, even by those who have no dandruff. It keeps the hair healthy and beautiful and prevents dandruff.

FAMO is sold at all toilet goods counters, also applied at the better barber shops. It comes in two sizes—a small size at 25 cents and an extra large bottle for \$1.

Seborrhea is the medical name for a scaly, itchy, flaking of the scalp. The seborrheic condition forms in scales of fat and is caused by dandruff.
